Summary

Ambitious and challenge-oriented Web Engineer proficient with both Front and Back End technologies/tools. Focused on meeting deadlines and delivering scalable and accessible business solutions. Driven by curiosity I am an effective learner who is constantly seeking out new ways to grow as a person and as a professional.

Skills

Web Development: HTML5, CSS3, JavaScript, React, Remix, TypeScript, REST, APIs.
Testing Tools: Cypress, Vitest, and Jest.
Version Control/Source Code: Bitbucket, Gitlab, AWS CodeCommit, and GitHub.
Server Side: NodeJS, Express.

Experience

Microsoft   **Remote - AZ**
Software Engineer   **May 2022 - Present**
Developed and maintained user features for Flip, a free video discussion app used by millions of educators and students worldwide. Decreased code complexity and enhanced readability by refactoring old React class components into React Hooks. Refined the team's internal processes by writing, reviewing, and scaling development documentation. Kept 3 active repositories up to date by regularly conducting detailed code reviews. Investigated and set up a test strategy for the team for unit testing with Vitest. Collaborated with different teams and made direct contributions to the release of features, tasks, and fixes on the roadmap of the project. Technologies: React, Remix, TypeScript.

Cyber Dive   **Mesa-AZ**
Software Engineer   **Aug 2020 – April 2022**
Worked across the full stack in a fast-paced startup and engineered the parent dashboard for Aqua One, a fully monitored smartphone for kids. Translated rapidly changing business requirements into fully working features using React, Redux, and Sass. Authored several internal documentation and boosted onboarding and overall development speed. Diagnosed accessibility issues and educated the team with best practices. Maintained and scaled up event-driven backend microservices using NodeJS and NATS Streaming. Wrote unit and integration tests with Cypress and Jest. Proactively assisted in process ideation, implementations, and evolution in a startup environment. Technologies: React, Node.js, AWS.

Little Taller   **Phoenix-AZ**
Front-End Developer   **Feb 2020 – Jul 2020**
Successfully delivered an admin portal where users could view/export student reports. Leveraged admin capabilities to allow admins to manage other users' access to the portal. Directly collaborated with the Design team and translated the Figma mock into a responsive web application using React and Sass. Worked with a remote team of Backend Engineers, PMs, and Designers, and in many opportunities directly with the client. Technologies: React, Sass.

Education

Bootcamp Certificate in Full Stack Web Development
University of Arizona – Chandler, AZ
A 12-week intensive program focused on gaining technical programming skills in HTML, CSS, JavaScript, React, and Node.js (MERN Stack)
OCT 2019 - JAN 2020

Ba in Social Sciences
Maringa State University – Maringa, Brazil
JAN 2008 - JAN 2012
